

Eastrock Safety Cage

Eastrock is pleased to offer customized safety cages for your machinery. The safety cage offers a barrier against potential hazards by stopping rotation when the cage is open.

Eastrock Safety Cages are made from durable heavy gauge steel with an industrial powder coat finish. Expanded metal is used to provide clear visibility. Eastrock will customize your safety cage to your product specifications.

Price of the safety cage for a Furukawa HCR900 is \$5900.00.

To get a price on any other brand model of drill, please contact your Eastrock Sales Representative:

Sack Atwall Tel: 613-880-3653
satwall@eastrock.com

Chris Lavallée Tel: 613-203-2217
